SUMMARY

The Health Department requests consideration of this Council Bill that would amend the current City of Joplin Swimming Pool Design and Operations Code to prevent conflicts with the adopted International Swimming Pool and Spa Code (ISPSC).

BACKGROUND

The City of Joplin Health Department currently has a swimming pool operational and design code that was adopted in 2008. The recently adopted International Swimming Pool and Design Code (ISPSC) will take the place of the design and construction requirements found in Part 1 of the current health department pool code. The operational section of this existing health pool code is found in Part 2. Staff recommends keeping the operational section of the code with minor amendments where there is potential conflict with the newly adopted ISPSC. An updated operational swimming pool code will be researched for future consideration.

FUNDING SOURCE

The source of funding is the city's Health Fund and funds are included in the FY 2018-19 budget of the Health Department, however, no additional departmental costs are anticipated for this change.

RECOMMENDATION

Staff recommends adoption of this Council Bill on first reading.
