

The 2009-2012 Transportation Improvement Program (TIP) document is being amended to include five additional MoDOT Highway Projects and the updated amount of two existing Highway Projects. The five additional MoDOT Projects include the engineering and demolition of structures on the acquired right way on Route FF at Main Street and Highway 66 from Duquesne Road to Highway 249, MoDOT reimbursements to the City of Joplin and the Special Road District for intersection improvements at Route FF, and intersection improvements on Highway 43 at Douglas Fir Road. The MoDOT Project for the intersection improvement at Route FF is being updated for the cost increase. The City of Joplin Project for the Connecticut Viaduct from 24th to 26th Street is being updated due to the cost increase and the inclusion of additional funding agencies. The TIP contains transportation and transit projects in the Joplin Metropolitan Area that are partially funded by Federal transportation programs for a four-year period. Listed below are the amendments going into the 2009-2012 Transportation Improvement Program.
