I. **Call to Order:**

Mr. Tuttle called the meeting to order at 3:05 p.m.

II. **Tourism Venue Needs Assessment:**

Review the findings of the May 8th presentation during the City Council work session.

- Multipurpose Sports and Event Center
- Sports tournament
- Recreation programming
- Meeting and Event Space
- Expandable features
 - One side is designed for net and hoop (hardwood floor) sports. The floor could be removed to expand the trade/event footprint.
 - The opposite side is designed for events and trade show space but can accommodate indoor sports (turf). The ceiling is higher for trade shows, concerts, or a climbing gym. This end would also have a loading dock and doors.
 - The center portion would include four locker rooms/changing areas, staff offices, vending, a snack bar, a ticket booth, 2-4 small event/meeting spaces, and storage for out-of-season equipment.

Next Steps:

- Deeper dive into funding options
- Programming
- Further direction from Council

CSL International was asked to provide Options for a venue with varying s/f footprints.
